

ASTM A194 Gr8

Austenitic Stainless Steel Nuts

ASTM A194 Grade 8 is a standard material specification for high tensile nuts and other internally threaded fasteners, made from 304 Stainless Steel. Grade 8 nuts can be produced by means of hot forging, cold forging or machining from heat treated bar stock and used with ASTM A193 B8 bolts, screws and studs. ASTM A194 specification covers requirements for chemical composition, heat treatment, hardness, proof load, etc., for Grade 8 nuts
